ACHIEVEMENTS

★ Achieved 99.9% uptime for cloud services through proactive monitoring and incident response.

★ Reduced cloud infrastructure costs by 30% by optimizing resource allocation and implementing automated scaling.

PROFESSIONAL SUMMARY

Cloud Engineer with 4 years of experience in providing leadership in large scale infrastructure migration methodologies and techniques (IaaS/PaaS) including application migrations to cloud platforms (AWS, Azure, and/or GCP) within a large enterprise environment.

WORK EXPERIENCE

Cloud Engineer

📅 May / 2021-Ongoing

Seaside Innovations

📍 Santa Monica, CA

1. Supported AWS Cloud instances and used AWS command-line Interface to manage and configure various AWS products.
2. Wrote AWS Cloud Formation templates to create custom-sized VPC, subnets, NAT to ensure successful deployment of applications.
3. Implemented roles and groups for users and resources using AWS Identity Access Management (IAM) and also managed network security using Security Groups, and IAM.
4. Provided highly durable and available data by using S3 data store, versioning, lifecycle policies, and create AMIs for mission-critical production servers for backup.
5. Documented system configurations, Instance, OS, and AMI build practices, backup procedures, troubleshooting guides, and keep infrastructure and architecture drawings current with changes.
6. Utilized Amazon Glacier for archiving data.

Cloud Engineer

📅 May / 2020-May / 2021

Cactus Creek Solutions

📍 Phoenix, AZ

1. Participates in cloud architecture, design, implementation, and operations of infrastructure.
2. Work with stakeholders to understand requirements and translates into appropriate technical specifications for additions or changes to our infrastructure and/or services.
3. Maintain the security of the Infrastructure by monitoring our systems against intrusive attacks or other malicious actions, and coordinating the periodic audit of systems against established security guidelines.
4. Troubleshoots and resolves technical issues with infrastructure and/or services provided by third parties.
5. Monitor, maintain, troubleshoot, and create Vworkspace VDI containers as well as diagnose performance and availability of the VDI corporate infrastructure servers and networks.
6. Monitor and maintain the performance and availability of corporate cloud servers and network infrastructure Develop, document, and maintain operational processes and procedures.

EDUCATION

Bachelor of Science in Computer Science

📅 May / 2019-May / 2020

State University

📍 Chicago, IL

Focused on cloud computing, networking, and system architecture.
